

Csilla Becskei holds a dual degree as a veterinarian and applied zoologist from the University of Veterinary Sciences, Hungary. After her graduation, she worked as a clinician but her interest soon turned to science and she took up a research position at the Institute of Veterinary Physiology of the University of Zurich in Switzerland. Her research focused on the central nervous regulation of food intake. After obtaining her PhD degree she completed a clinical internship at the Small Animal Clinic of the Ludwig-Maximilians University of Munich, Germany.

At Zoetis, Csilla is an Associate Director in the Veterinary Medicine Research and Development group, based in Belgium. Her main focus is on the development of companion animal products.
